

Greedy Billboard & TV Attorneys' Lawsuit Abuse **Costs Us All**

Urge Nevada Legislators to Protect Nevada Families, **NOT GREEDY LAWYERS**

Nevadans all over the state are struggling with an affordability crisis, and too many families cannot afford necessities like housing, groceries, insurance, utilities, transportation and healthcare.

Lawsuit abuse is driving up the cost of living for all of us. Frivolous lawsuits against businesses and individuals get passed along to us *all* in the form of higher prices for insurance, housing, food, transportation and more!

- ✗ According to the U.S. Chamber of Commerce, **the hidden costs of lawsuits is over \$4,600 in higher costs** per Nevada household annually.¹
- ✗ Excessive litigation also deters businesses from investing in the state and **costs over 31,000 Nevada jobs every year.**²
- ✗ The **average Nevadan spends 5% of their annual salary on car insurance** alone³ – higher costs made worse by excessive litigation and insurance liability requirements.

Nevada Legislators Should Represent Us, **NOT GREEDY LAWYERS**

Instead of siding with working families, too many Nevada politicians are siding with greedy attorneys by passing laws that make it easier and more lucrative for the lawyers to file lawsuits – **and make it more expensive for everyone to live.**

- ✗ It's no surprise **trial attorneys have contributed more than \$4.5 million** to Nevada politicians and candidates since 2017.⁴

We need Nevada's elected officials to represent us and start working to bring costs down for hard-working families!
